

April 4, 1973

SENATOR CARPENTER: In what manner?

SENATOR NORE: Well, in...

SENATOR CARPENTER: In the teaching.

SENATOR NORE: Yes.

SENATOR CARPENTER: All I can tell you is what Mr. Varner has told me and that of the Med School, what they intend to do. I accept their word for it.

SENATOR NORE: Yes. I'd like to say that as far as western Nebraska is concerned, I have no interest out there financially, in any way. So, I'm completely neutral on that, but I do feel that western Nebraska has a tremendous future. One of the areas is in the area of cattle feeding. After the winter that we have had this year, I am quite sure that we are going to have many of our large cattle feeding operations move to the west end of the state because of the climate, the type of the soil, and the lack of mud. That is in certain areas of Nebraska, and one of our largest feeders, Dinklages of Wisner, have already moved out there. I think they have about a quarter of a square mile of yards there, now. So along with that will go other industries, for instance, the packing industry, the trucking industry, and there will be whole myriad of industries that will follow this particular movement, and we haven't even, as far as I am concerned, I don't think we've scratched the surface on developing the west end of Nebraska. It's really at the gate...having been in the commodity business, it's really at the gateway to the tremendous demand for consumer goods in the way of food on the west coast, and I have a feeling that probably that this facility out there might serve a good purpose. This is the school our Appropriations Committee visited. The buildings are well built, in fact, about as good as I have seen in the state of Nebraska, and they are pretty well suited for most any kind...any kind of a facility, and the quality is good in the way of capitol improvements. So, I, probably, am not talking in favor of...not favoring anyone in my particular district.

SPEAKER: Senator Nore, excuse me, but Senator Keyes is asking for a point of order. I will have to recognize him. Senator Keyes.

SENATOR KEYES: Yes. Mr. Speaker, I can understand quite a few things about what we have talked about for the last three hours, but when you get my packing houses mixed in with the Hiram Scott College, I think we are completely off of 179, so I'd ask for the question. I don't think anybody has changed their mind in the last three hours of debate. I certainly have gained an awfully lot about colleges, and so forth, but when you start in on the packing houses and associate them with it, I think it is time that we call for the question and go ahead and vote.

SPEAKER: Senator Nore, I presume that you will be finishing, shortly.

SENATOR NORE: Yes. I can see his thinking, his narrow economic thinking, so I disagree with him.

SPEAKER: Senator Kime.

SENATOR KIME: Mr. President, I will try and make this short and I will try and stick to the point. I rise to support the kill motion and I will tell you why. Scottsbluff has a very fine, a very fine nursing school. I have a niece who graduated there many years ago. I have another niece who is going there now. She will graduate in another year as a registered nurse. Chadron College have had pre-med courses for many years. Now, why did Hiram Scott fail out there. As Duke
